Introduction

First of all, congratulations and thank you for downloading The Mud Maestro System.

Most punters believe that heavy going is the most unpredictable of racing conditions – and they're right! Heavy going can make the classiest horses ordinary and the most ordinary horses into world beaters. A very particular type of horse is required to perform to its best on heavy ground.

However, I started this research with the premise that the charges of certain trainers consistently perform better on heavy going than those of others. There could be a number of reasons for this – specific training facilities at the yard, the trainer's preference for horses with a particular action etc, etc. My premise proved more accurate than I could have imagined and became the foundation stone of this system.

Kieran Ward
MYBP Ltd

P.S. You can find out more about me and my ongoing antics in the battle against the bookmaker at my blog:

The Mud Maestro System

The rules of this system are simple but very effective.

Back the following trainers horses when they are running on heavy ground.

- KC Bailey
- Jennie Candlish
- NJ Gifford
- A King
- NB King
- R Lee
- R Nixon
- GA Swinbank
- Mrs AM Thorpe
- Nick Williams

The system is simplicity itself to use. In the morning simply check the going at each meeting for the day. If there is no meeting with heavy going, there are no bets for the day.

If there is a meeting with heavy going, check whether any of the trainers on the list have a runner at that meeting. If they do, it is a qualifying bet. It's as simple as that.

The rules are so simple you might think it unlikely that such a system could be profitable but you would be very wrong. Backing to level stakes of £10 since January 2008 would have produced profits of £2740 at industry SP. These profits could have been massively improved by using Betfair or taking an early morning price with Best Odds Guaranteed.

It is also worth remembering that these profits have been produced from only 496 bets in just under 4 years. There are very few bets in the summer months, for obvious reasons. During the winter months it averages 10 bets a week that tend to come in bunches, again for obvious reasons. This system is a perfect addition to a portfolio of systems aiming for long term capital growth.

Statistics

Below is a table that shows important statistics when analysing the system:

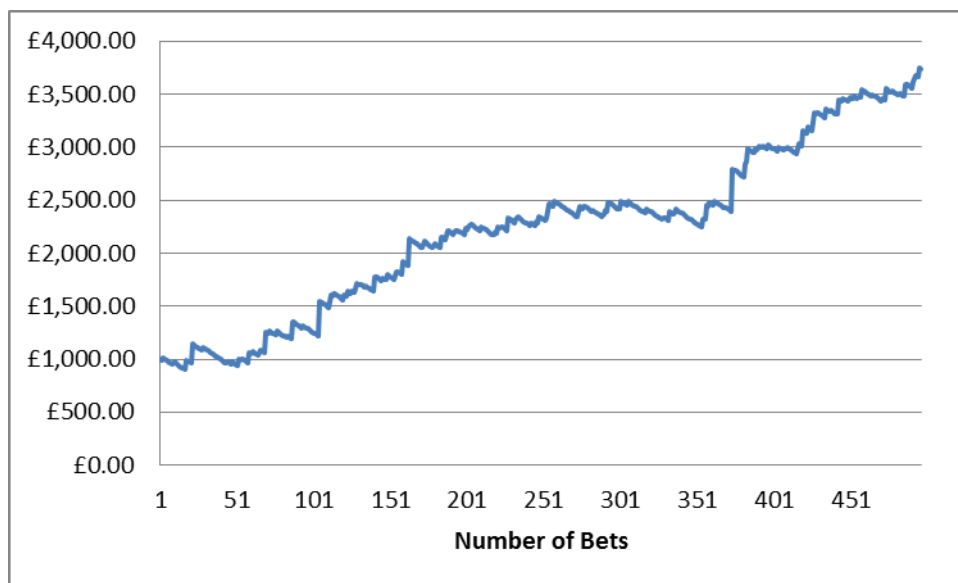

Longest Losing Run	18
Longest Winning Run	3
Best Year	+80.72 pts
Worst Year	+ 54.51 pts
Overall Profit	+274.06 pts

Staking Plan

Be wary of systems sellers that advocate the use of a staking plan to overcome flaws in their product. Any system worth its salt makes profits with level staking, and The Mud Maestro System does just that.

Great profits can be made using a level staking plan. The graph below shows growth of betting bank since Jan 2008 betting £10 level stakes.

Growth of £1000 bank at £10 level stakes

However, more excitingly, vastly increased profits can be produced using the power of compounding. The graph overleaf shows growth when staking 1% on all selections starting with a £1000 bank and recalculating your stake on a daily basis

Growth of £1000 Bank with 1% Staking adjusted daily

A very conservative staking of 1% of starting bank on each selection, adjusted on a daily basis, has seen that bank grow to £10,889 in just under 4 years. This represents an increase on your starting bank of over 1000%!

So there you have it - an easy to operate system that produces consistent profits year after year for a very small investment of time.

Good Luck

Kieran
